

DAY-TO-DAY VHF MAINTENANCE

Step 1

Daily: Rinse off salt water with fresh water

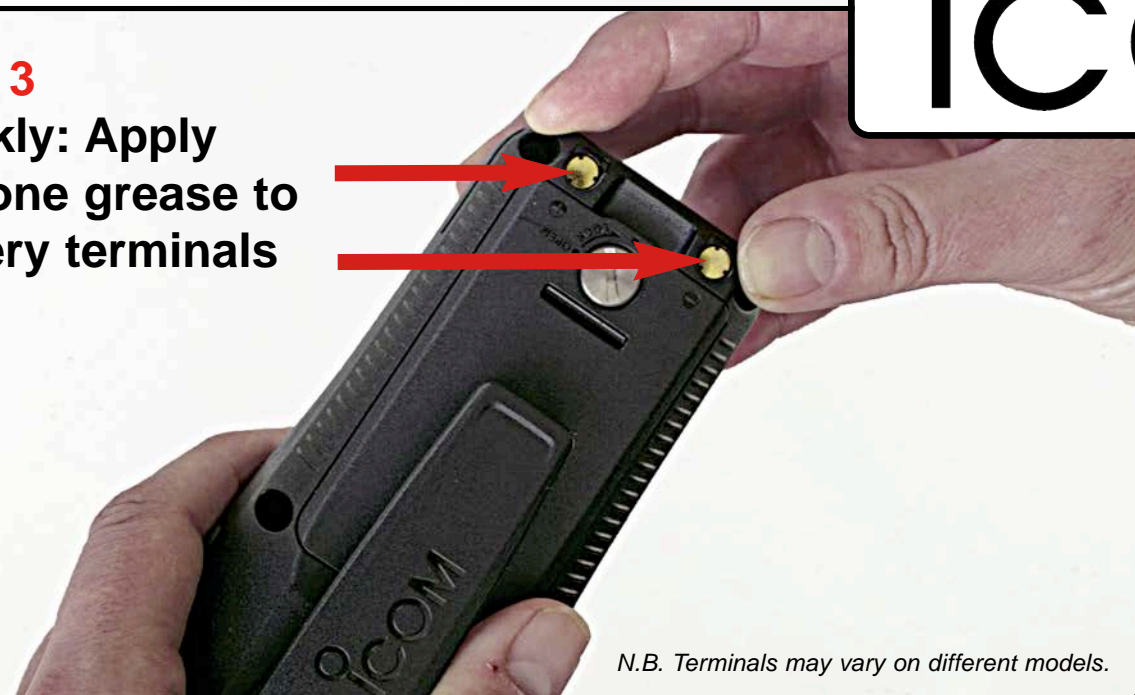

Step 2

Daily: Radios must be dry before placing in battery charger.

Step 3

Weekly: Apply silicone grease to battery terminals

Step 4

Weekly: Unscrew antenna and apply silicone grease to antenna socket

- Please replace antenna on first sign of rubber perishing.
- Check contacts in charger base for water ingress and/or corrosion - replace if in doubt.
- Check charging contacts on back of radio - clean and grease if necessary.
- These recommended maintenance steps apply to most ICOM **WATERPROOF** VHF handheld radios.
